APPOINTMENT OF DIRECTOR

Yojee Limited (**Yojee** or **the Company**) (**ASX: YOJ**) is pleased to announce the appointment of Mr Ray Lee to the position of Non-Executive Director of the Company.

Mr Lee is a well-respected port development, port management and operations executive, with over forty years international logistics experience. Ray's experience includes 15 years with P&O Ports in senior management roles and six years at Patricks Port Botany as General Manager. As General Manager of Stevedoring for Qube, Ray was responsible for 32 bulk and general ports throughout Australia. His latest corporate roles have been with DP World where he was northern hemisphere Director of the Gold Programme, which involved Executive Management succession planning for 10 ports on three continents. As Australian and New Zealand/Pacific Regional Director of Operations, Ray played a key role leading DP World's Australasian port operations.

As Director of Portside Solutions Ray consults on significant projects for global companies including APM Terminals and DP World, as well as Australian Port Authorities. More recently Portside has been engaged in examining pit to port solutions for multiple mining and bulk commodity companies throughout Africa, South America and Australia as well as General Management coverage to DP World's Australasian terminals.

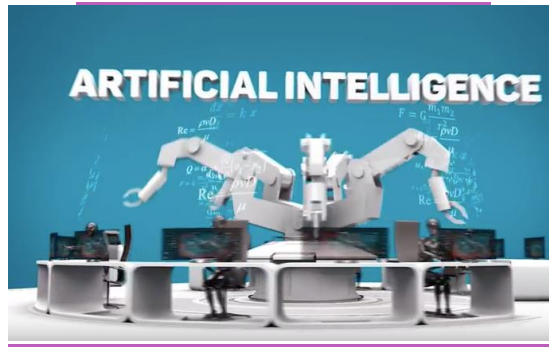

Welcoming his appointment, Yojee's Managing Director, Ed Clarke said: "Ray is an invaluable addition to the Yojee board of directors with his considerable commercial and logistics management experience both within and outside the port industry. It's a great validation and almost a graduation of such a young company to attract someone of such a high caliber, and gives our business great opportunity in new areas of commercialization and geographical expansion."

Commenting on his appointment, Ray Lee said: "I am delighted to be joining the Yojee board. Yojee's highly scalable platform is an innovative technology, disrupting the traditional logistics industry and I am extremely excited by its growth potential."
